# ASX Announcement

28 September 2026

# PART V APPROVAL FOR ROE PROJECT RECEIVED

Ramelius Resources Limited (ASX: RMS) ("Ramelius" or "the Company") is pleased to announce that further to the Western Australian Environmental Protection Authority's (EPA) decision not to assess the Roe Project (Roe) under Part IV of the Environmental Protection Act, the Department of Water & Environmental Regulation has granted a Works Approval under Part V of the Environmental Protection Act. Routine Mining Act approvals (MDCP and Clearing Permit) are now all that is required for Roe, noting that Rebecca has already secured all environmental and mining approvals.

The outcome represents a significant project milestone, confirming that the environmental impacts of the development can be appropriately managed. Key construction packages, such as the process plant EPC scope have been issued for tender and early works development of Rebecca will soon commence covering items such as access road, camp, airstrip and borefields.

The decision provides the necessary certainty and optionality to accelerate development timelines and optimise project outcomes, a key component of Ramelius' recently released 4-Year Outlook, that shows gold production is expected to be around 600,000 ounces by 2030[1].

Managing Director, Mark Zeptner, commented:
*"This is a vital milestone for the Rebecca-Roe Project and the wider Ramelius business. The regulator's decision reflects the thorough nature of our environmental planning and commitment to responsible development and is a significant step toward production."*

This ASX announcement was authorised for release by the Board of Directors.
